Solar starry strip light

MODEL: HA085233

DESIGN DRAWING

solar, no wiring

Shown: 16.5 Ft

⚠ **Read all instructions before you start, and keep them for future reference. This strip is solar. There is no wiring and no transformer.**

Installation precautions

1. This strip is solar. It has no mains plug and needs no transformer or electrician.
2. Charge it fully before first use: switch it on and leave it in sun for one to two days.
3. Face the solar panel to open sky, away from shade and other lights, so it charges fully each day.
4. Do not cut this strip. Order the length you need.

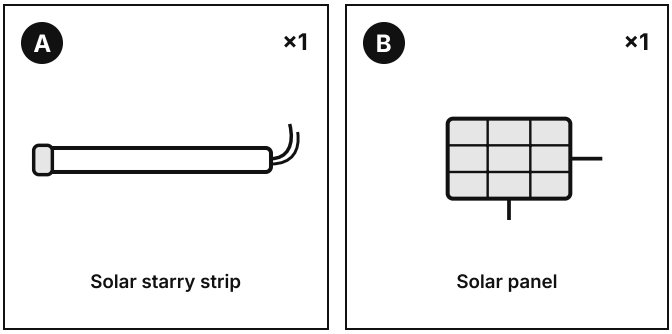

Tools needed

Tape measure | Phillips screwdriver | Drill | Pencil | Clean cloth

Parts list

CHECK ALL PARTS BEFORE YOU START

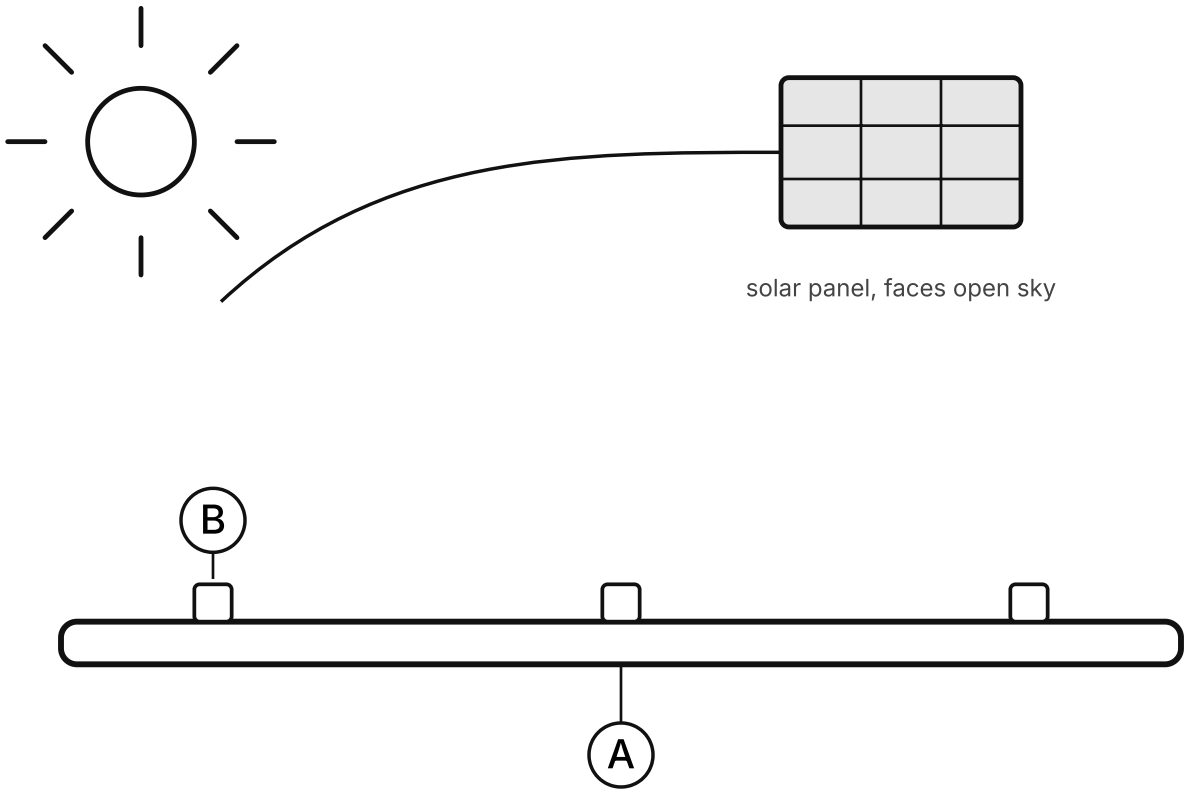

The solar panel and a built-in battery power the strip. No transformer and no wiring to house power.

Light and power

Light and power	
Power	Solar panel (5.5V 5W) charges a built-in battery (4000mAh)
Light	Built-in starry LED
Control	Comes on by itself when it gets dark
Cut	Not cuttable; order the length you need
Rating	Sealed for outdoor use, IP68

Keep the solar panel clean and in full sun. A shaded panel means a short run time at night.

Exploded view

No wiring. The panel charges a built-in battery.

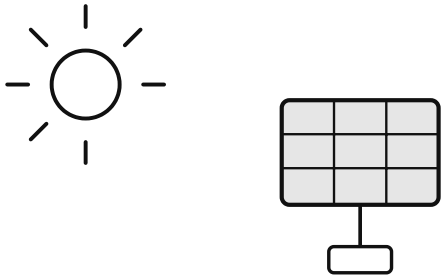

A Solar starry strip ×1 **B** Solar panel ×1

Length options
16.5, 33, 49.2 or 98.5 feet

Installation

STEPS 1–4 OF 4

1

face the panel to open sky

Place or fix the solar panel where it faces open sky, in full sun for most of the day.

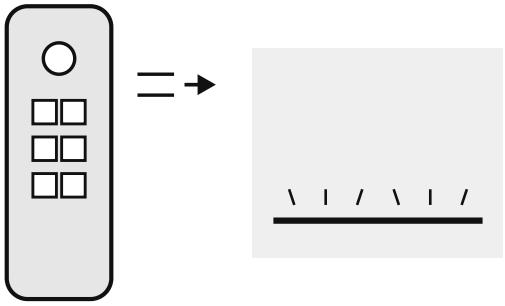

2

fix the strip with the clips or adhesive

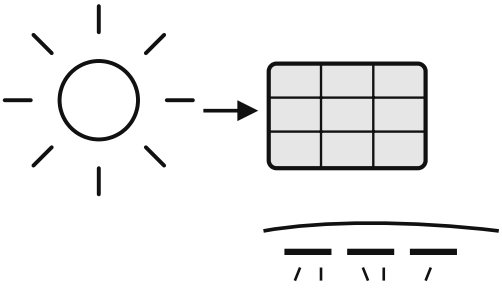

Run the strip where you want the light and fix it with the clips or by winding it in place.

3

Switch the strip on. It comes on by itself when it gets dark.

4

lights come on at dusk

Leave it to charge in daylight. After a full day's sun it lights through the evening.

Care

- Wipe the solar panel clean of dust and leaves so it charges fully.
- Wipe the strip with a soft, dry cloth.
- In winter, charge it fully now and then if days are short.

Troubleshooting

Problem	What to do
Does not light at night	Check it is switched on and the panel had a full day of direct sun. Charge it fully before first use.
Short run time	Clean the panel and move it out of shade and away from other lights that trick the sensor.
